WALLPAPER

The ad provides a premium opportunity to capture readers' attention with an immersive, visually compelling experience that frames, rather than disrupts, reading the news.

SPECS

DIMENSIONS	STATIC FILE SIZE
Two 445x1036 files	175k per image

Use this tool to test out your wallpaper:

<https://mediasolutions.seattletimes.com/wallpaper-test>

NOTES

- The ad should be designed to suggest a single coherent image or experience across both files.
- Following user-tested parameters, ads are structured into "Safe Areas" to ensure a high-quality presentation of branding, messaging and focal imagery across most of seattletimes.com users' desktop devices. Logos and text are limited to what fits in the "Text Safe Area" to ensure visibility for most users (an area that is 142x700 in the right wallpaper image). Focal imagery should be oriented for visibility in the "Image Safe Area" (areas in both left and right files that are 1366x768). [Refer to our Wallpaper Testing Tool for examples and to test your files for adherence to Safe Area specifications.](#)
- Logos and text are restricted to the right side only, including prominent logos/text visible in imagery, with limited exceptions. Exceptions include branding/names on uniforms worn by people featured in photo imagery, and incidental branding/signage in landscape photos that is clearly not intended as messaging. Design feedback and assistance is available.
- Logo and messaging is not required when wallpaper is part of a takeover.
- No tiled background images allowed.
- A single background hex code must be provided by the advertiser to ensure a seamless presentation of the wallpaper on larger monitors. For best effect, it is recommended that the bottom edges of the creative files blend to the gutter color.
- Advertiser must specify which image goes on the left and right.
- All wallpapers subject to creative review and feedback prior to acceptance for launch. Design assistance is available.

PRE-ROLL VIDEO

Interact with your audience as they watch videos by placing your video ad immediately before viewer-selected content. This product is available for desktop, tablet (portrait and landscape views) and mobile.

SPECS

AD TYPE	DIMENSIONS	FILE SIZE	ANIMATION	DOWNLOAD TEMPLATE
Pre-roll Video	400x300	N/A	15 seconds or 30 seconds are supported.	N/A

Expansion, polite download and video are not applicable for this product.

IN-STORY VIDEO

Build on your brand awareness with video spots accross SeattleTimes.com and our network partners by placing :15 and :30 videos following the third paragraph of a story, in-stream. This product is available for desktop, tablet (portrait and landscape views) and mobile.

SPECS

AD TYPE	DIMENSIONS	FILE SIZE	ANIMATION	DOWNLOAD TEMPLATE
In-story Video	up to 1920x1080	N/A	15 seconds or 30 seconds are supported.	N/A

Expansion, polite download and video are not applicable for this product.

NOTES

- A video file is all we need.
- Resolution (in pixels): Max 1920x1080 - Min 640x360.
- Maximum file size: 20 MB.
- Video formats: All video formats including FLV, MP4, MOV, VAST, VPAID*, and YouTube videokey.
- Recommended Length: 30-sec desktop, 15-sec mobile (there is no actual restriction on video length).
- Aspect Ratio: 16:9 (4:3 is not supported).
- Codec: Any video codecs format except ProRes 4444, HDV 720p60, Go2 Meeting 3 & 4, ER AAC LD and REDCODE.
- Sound Setting: On.

*Due to the large number of 3rd-party video providers, please test VPAID with your Account Manager before the campaign is set to launch - VPAID does not currently work on mobile.

E-NEWSLETTERS
